Guideline Descriptions

Required/Governance

- **WorkSafe BC**: High level guidelines around health & safety requirements in BC
- **Health Authorities**: Treat regional health authority as authority unless it's superceded by provincial health authority
- **Ministry of Education guidance framework**: General and governance document that summarizes BC specific information and guidance

Optional/Operational

- **CULC Toolkit**: Will be released May 21st. Very detailed reference document (80 p.) for all the areas to consider & related resources
- **ABCPLD Best Practices**: Operational and more detailed, focused on the way we implement BC requirements, created by a group of Directors
- **Guidelines/Checklists from outside BC**: like the guidelines being produced by ALA or ALIA
- **BCCDC guidelines (when available)**: Not yet released. Will hopefully address materials handling and computer protocols.
